SUMMARY

Passionate Unity Game Developer with 1.5+ years of learning experience developing 2D and 3D games using Unity and C#. Skilled in gameplay programming, game mechanics implementation, UI systems, debugging, and version control. Experienced in participating in game jams and building complete game projects from concept to deployment. Seeking opportunities to contribute to innovative game development teams while expanding expertise in gameplay systems and interactive experiences.

EDUCATION

Monolith Research and Training Labs Pvt Ltd, Chennai, Tamil Nadu

Advanced Diploma in Game Design and Development

2025 – 2026

Mailam Engineering College, Villupuram, Tamil Nadu

Bachelor of Technology (Information Technology), CGPA: 8.1

2021 – 2025

PROJECTS

Bro's Jump | Unity 6, C#

- Developed a cooperative puzzle platformer featuring custom gameplay mechanics, physics interactions, and WebGL deployment.

RC Multiplayer Prototype | Unity 6, Netcode for Game Objects

- Built a multiplayer RC vehicle prototype with synchronized movement, networking, and vehicle physics.

Pong Clone | Unity, C#

- Recreated the classic Pong game with AI opponents, scoring, collision handling, and game state management.

TECHNICAL SKILLS

Game Development: Unity 6, Unity Engine, C#, Gameplay Programming, Physics Systems, Animation Systems, UI Development, Mobile Game Development

Programming Languages: C#, C++, Java

Tools & Technologies: Unity, Blender, Git, GitHub, Visual Studio, Photoshop

Core Concepts: Object-Oriented Programming, Version Control, Debugging & Optimization

GAMEPLAY MECHANICS

- Character Controller & Physics-based Movement
- Multiplayer Networking (Unity Netcode for GameObjects)
- AI, UI & Gameplay Systems nity Learn – Create with Code

CAREER INTERESTS

• Unity Developer – Unreal Developer- Gameplay Programmer –PC & Mobile Game Developer - Technical Design
